

SICO ROLL N' SET

The Ultimate in Performance Stages

Fast Set-Up Time:

- An experienced crew of 4 can set a 40' x 64' (12.2m x 19.5m) stage in less than 30 minutes, (60 minutes with accessories package) saving labor costs for many years. The Roll N' Set stage can be cleared in even less time.

Easy To Use:

- No lifting of decks: Four - 4' x 8' (1.2m x 2.4m) decks are stored directly on each mobile frame; 128 sq. ft. (12 sq m) of stage per unit! Crewmembers will simply slide decks into place. This time-saving feature eliminates the need to lift any decks during set-up.

Easy Height Adjustment (Two Choices):

- The exclusive "Auto-Lift" feature allows the stage height to be raised or lowered by simply using the power from an electric drill, without removing any decks. (Special power drill package provided with stage.)
- Optional "Gas Spring" lift assembly available.

Versatile Operation:

- Entire sections of the stage can be relocated without disassembly! Footpedals easily raise or lower the stage units on or off oversized casters.

Solid Attachment:

- The flex pin connectors provide a quick and solid attachment between the decks and the frames without any loose parts or hole-plugs.

Reversible Decks:

- Reversible decks offer a long wearing carpet surface or a scratch resistant Tuff-Deck smooth surface.

Storage:

- The Roll N' Set stage units are quickly folded, and easily rolled to and from your storage area. No deck pallets or storage caddies are required, saving money and storage space. Folded Roll N' Set stage units serve as mobile folding caddies for the decks. Stored units are also designed to accommodate forklifts.

Riser Configurations:

- Optional connectors can be used to create a tiered seating riser configuration.

Accessories:

- Adjustable step units, ADA ramps, guard rail covers, drapes, backdrops and crowd control barriers (see pages 10 & 11).

Guard Rails

- This added safety feature must be used with all SICO stages and risers.

Stacking caddies available

SICO EXCLUSIVE!

Universal Pin Connectors are capable of 2, 3 or 4-way bridging. They always remain in place and they allow any stage unit to work in any location. Expanding rubber gasket at the base of each flex pin allows decks to be secured to the frames.

SICO EXCLUSIVE!

Adjustable glide provides for small height corrections.

SICO EXCLUSIVE!

Bridging bars store directly on the frame.

SICO EXCLUSIVE!

Convenient foot pedals easily raise the stage units onto rugged casters, so that entire stage sections can be relocated without disassembly.

SICO EXCLUSIVE!

- The multi-layer construction of the decks eliminates annoying "drumming."
- The holes in the corners of the deck go all the way through, making it easy to visually line up the flex pins on a frame.
- Velcro around each deck allows for quick and easy installation of stage skirting without any clips or pins.

SICO EXCLUSIVE!

All operational parts are painted a bright yellow for easy identification.

SICO offers free space analysis drawings, which will provide accurate layouts for your venue with the appropriate number of stages and stage accessories.

SICO ROLL N' SET SPECIFICATIONS:
 8' x 8' (244cm x 244cm) stage units consist of two 4' x 8' (122cm x 244cm) Venue Maker decks.
 Model #SRS318AB: 48" to 72" height (122cm to 183cm)
 Model #SRS381BB: 42" to 60" height (107cm to 153cm)
 Model #SRS318CB: 36" to 54" height (92cm to 137cm)
 Model #SRS318DB: 39" to 62" height (100cm to 160cm)
