

Choice #2: EUROBED®

- The most space efficient bed in the down position as bed is recessed 10" in the cabinet.
- European slot system adjusts to the contours of the body and replaces the box spring.
- Easiest and quickest bed to install.
- Lifting and lowering the bed is so easy you can do it with a fingertip.
- 5-year warranty on frame and mechanism.

Headboard is padded for comfort and covered with a durable naugahyde-vinyl that is easy to clean.

Micro-adjustable mechanism located inside bed frame - no mechanical parts are seen. Fully adjustable bed mechanism allows for precise tension adjustments.

Bumper Stop positions the bed so the frame is flush with the recess when bed is in the up position.

Durable aluminum extruded bed frame requires **minimal assembly**.

The EUROBED® takes up **10" (25cm) less floor space** than THE ROOM MAKERS® Wallbed when the bed is down.

Folding leg support stabilizes the bed in the down position. Secures mattress when bed is raised.

Unlike other wallbed systems that use a few small helical springs attached to the floor, SICO's EUROBED® uses up to 9 factory calibrated **heavy duty springs** in each mechanism.
