

# Specifications for the SICO Room Maker® Series Wallbeds

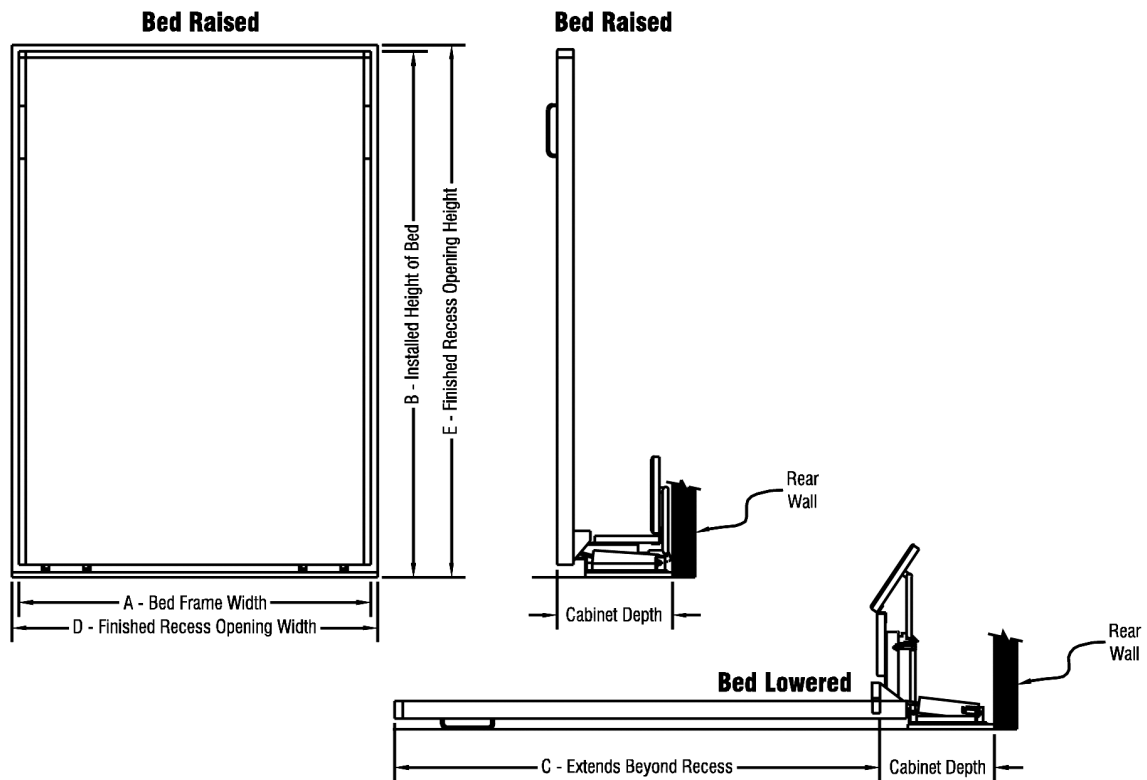

## Raise a SICO Room Maker® Wallbed & watch your profitability grow!

SICO Wallbeds allow your rooms to be quickly converted from one use to the next because they raise so easily. Your sleeping rooms can serve for many other revenue-producing uses besides offering a good night's rest. SICO's Room Maker® series wallbeds use a unique compression spring system that makes raising and lowering the beds so effortless. When raised, the bottom of the bed provides a finished face that is the finished wall closure. There are no doors to contend with.

**Materials:** The frame is 16 gauge (1.66mm) or heavier C.R.E.W. steel tubing, electric arc welded construction. Rubber corners. Springs: heat-treated alloy steel. Headboard: padded, then covered with Naugahyde vinyl.

**Construction:** The frame is bolted to the hinge assembly, which is secured to the floor. The box spring is attached to the frame and the mattress affixed to the box spring with a figure-8 strap.

Adjustment bolts allow for easy alignment in the wall opening and compensate for the weight differences in bed faces and bedding. A detailed step-by-step installer's guide is included along with the number for our toll-free help line.

## SICO Room Maker Wallbed® Color & Design Options

A SICO Wallbed may be placed in beautiful wood cabinets that make it the centerpiece of the room. It may be placed in a modest cabinet, which will blend into the room, or it may be built into a wall without cabinets. There are many color options with SICO Wallbeds.

# 1.

**Installation methods:** SICO wallbeds may be installed with a broad range of cabinets, which allow for one-day installation in most facilities. In addition, SICO wallbeds may be installed into a built-on-site drywall recess. This is possible when planning them into new construction.

# 2.

**Cabinets by SICO:** Most hotels purchase SICO semi-custom cabinets, which are made to standard dimensions, but allow for a broad range of woods and finishes. Many modest facilities have used SICO's standard cabinets, which are a contemporary style with a melamine finish in either white, almond, or natural oak woodgrain finish.

# 3.

**Custom cabinets by SICO:** Designers may furnish SICO with their designs, or SICO has a full-time design staff which can custom plan the wallbed cabinets to fit with a facility's furnishings or style. There is no cost or obligation for quoting the production of a design or the design work by SICO's design staff.

# 4.

**Headboard & boxspring vinyl:** The headboard and vinyl are available as standard in any of the following Naugahyde colors, Frosty White, Natural Almond, Fusion Maple, Banister Oak, Wild Cherry, or Black. They may also be ordered in any of the colors in the Naugahyde Spirit Millennium collection.

# 5.

**Frame and handle colors:** They are finished with electrostatically sprayed and baked acrylic in a choice of White, Almond, Sand, Putty, Terra Cotta, or Black. The frames and handles may be ordered in a custom match to any of the colors in the Naugahyde color selections.

# 6.

Brass or chrome frames and handles are also available: Select either polished chrome or bright brass finishes instead of paint.
