

SICO 1800 STAGE & RISER SYSTEM

The SICO 1800 stage is perfect for facilities that are constantly setting up and taking down their risers, because each unit folds and rolls. No carts are required for stage sections. Lifting is minimized, and conversion is easy and fast. See SICO's **Stages & Risers** brochure for more information. **FREE Custom Design Service!** If you don't find the configuration that works for you, send us a drawing of your room (including measurements), list your desired capacity, shape and type of SICO stage and accessories. SICO will design a custom drawing just for you.

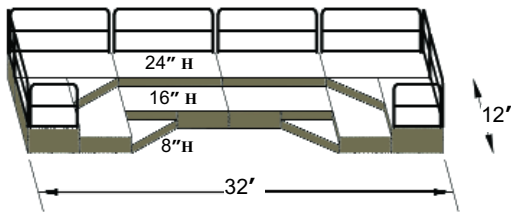

Skirting and enclosure panels are optional accessories.

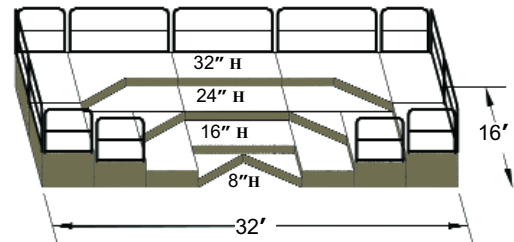

Adjustable height models easily convert to a one level stage set-up. Add versatility!
