

Custom School Graphics

Expanding Possibilities

sicoinc.com

The Trusted Go-To Company

Since 1951, our mission has gone beyond creating innovative furniture solutions. We see your facility not just as it is, but as what it can be. Every SICO® product is driven by insights, engineered with innovation, and built to last. We've been dedicated to crafting advanced solutions that help schools stand out and capture attention. Our flexible designs create inviting, inclusive environments that foster engagement and build community. By transforming educational spaces into versatile, multi-purpose environments, we help maximize every square foot while offering visual variety across the product mix. No one has delivered innovation over time like SICO®.

Bring Life and Culture to Your Space Using Graphics

Graphics enhance the visual atmosphere of the cafeteria, making it more inviting, colorful, and engaging. School logos, mascot, or colors can foster a sense of school pride and unity. Bright, colorful graphics can help uplift students' moods and make the cafeteria feel like a more enjoyable space. This contributes to a positive social experience during mealtime, where students feel comfortable and happy.

What are Custom Graphics?

Graphics can be placed on tables, walls, columns and other surfaces in your space. Using state of the art processes, your school colors, logos and school motto can be “printed” and applied virtually anywhere. These can be made of many different materials depending on the surface it is being applied to.

Table Graphics

Table graphics are directly manufactured within the laminate for a custom look and the longevity you have come to expect with high-pressure laminates. It is a great way to display school pride while in use or while in the folded position.

Wall Graphics

Wall graphics can be placed on most vertical surfaces. Custom dimensions and large format are available. Depending on the surface characteristics, one of the following standard methods will be used: Adhesive Backed Vinyl, Rigid PVC, Magnetic, or Window Cling.

Mural

Murals do more than decorate, they expand the environment, turning everyday spaces into immersive, inspiring experiences. Whether in rigid PVC or adhesive vinyl, these bold visuals spark imagination and foster a sense of belonging for every student.

Full Wall

Full wall installations transform blank surfaces into bold statements, immersing students in environments that inspire, inform, and energize. They create a sense of place and purpose, supporting wayfinding, celebrating school pride, and encouraging creative storytelling.

Molding

Molding graphics durability with design—ensuring visuals won't peel, fade, or wear over time. This built-in approach delivers vibrant, lasting imagery that energizes student spaces and stands up to daily use.

Column

Column graphics make an instant impact, drawing the eye and transforming vertical space into a bold design feature. Perfect for catching attention in high-traffic areas, they add dimension, elevate school branding, and bring unexpected energy to the environment.

Squares

With endless configuration options, these panels spark creativity, encourage collaboration, and transform ordinary areas into engaging environments where students feel inspired to connect, explore, and thrive.

Lettering

Lettering brings school names, mottos, slogans, logos, and inspirational quotes to life with a crisp, clean design. It's a powerful way to reinforce school identity, motivate students, and create a sense of pride in every space.

Windows

Windows are a canvas for creativity, blending functionality with visual impact. Use them to create security while also delivering school messaging.

Doors

Doors are more than just passageways, they're prime real estate for school branding, colors, and messages.

Floor

Custom floor graphics improve safety with clear directional cues while transforming hallways and common areas into interactive, educational spaces.

Magnetic

Magnetic signs make it easy for schools to update messages, schedules, and announcements quickly while keeping displays neat, organized, and reusable.

Tables

Full-color digitally printed graphics produced on commercial-grade laminate. Table graphics transform everyday dining spaces into opportunities for both social interaction and learning. They encourage collaboration, curiosity, and school pride while reinforcing classroom concepts in a relaxed, informal setting. By turning tables into interactive learning surfaces, schools can create a more welcoming environment that supports student engagement and community building.

Common Materials Guide:

Adhesive Backed Vinyl

A printed, self-adhesive vinyl film that is applied directly to a wall or other smooth surface to create murals, branding, and decorative graphics.

Rigid PVC

A rigid plastic sign panel with printed graphics that is mounted to a wall, creating a durable and dimensional display.
