FOR IMMEDIATE RELEASE

SICO Introduces the Axis™ Table: Built for the Cafeteria, Ready for the Classroom

Innovative new mobile table seats students at lunch and doubles as a collaborative workspace when the meal period ends.

SICO, the space-optimization furniture manufacturer trusted by schools for more than 75 years, today expanded its educational furniture lineup with the launch of the **Axis™ Table**, a durable, fully assembled cafeteria table designed for the demands of back-to-back meal periods, and versatile enough to serve as a workspace when lunch is over.

Today's cafeteria is rarely just a cafeteria. Between meal periods it becomes a study hall, a group project space, a meeting area. The Axis™ Table is built for that reality: integrated pivoting stools swivel between sitting and standing, and a built-in spring mechanism lifts each stool clear of the floor when not in use—so custodial teams can clean between lunch periods in seconds. The pivoting arm and round-stool design adjust to deliver a comfortable fit for students of every size and age.

"Today's flexible student dining and common spaces do far more than serve meals—they're used throughout the day for learning, collaboration, dining, and socializing," said Heidi Niesen, Vice President of Sales & Marketing at SICO. "The Axis™ Table was designed for that reality, providing schools with a durable, adaptable solution that transitions seamlessly throughout the day. It helps schools maximize the value of every space while supporting the changing needs of students and staff."

Integrated pivoting stools swivel between sitting and standing, and a built-in spring mechanism lifts each stool clear of the floor when not in use—so cleaning between meal or class periods takes seconds. The pivoting arm and round-stool design adjust to deliver a comfortable fit for students of every size and age.

Engineered for high-traffic dining environments, the Axis™ Table features four reinforced backpack clips, each rated to 100 lbs, and heavy-duty locking casters for easy repositioning between service and cleaning. At just 32" wide, it rolls through standard doorways—so a table that anchors the lunchroom can just as easily support a science lab, makerspace, library, or classroom.

Available in two heights and two sizes, the Axis™ Table suits everything from elementary lunchrooms to high school commons. It arrives fully assembled, no tools, no downtime, delivering smart design, lasting durability, and everyday convenience in one package. The Axis™ Table is available now. For more information, visit
